

AI Internship Interview Hiring

AI Interview Pipeline (Internship Hiring)

Flow Overview

Each round has:

- Objective
 - Evaluation Criteria
 - Adaptive Questions
 - Passing Threshold
 - AI Feedback
-

Round 1 — Introduction & Resume Screening

Objective

Validate the resume, evaluate communication, and determine whether the candidate possesses the foundational knowledge required for the role.

Duration

10–15 minutes

Difficulty

Easy

Question Categories

Category	Questions
Self Introduction	1
Resume Walkthrough	2–3
Skills Verification	2
Motivation & Career Goals	1–2

Total: 6–8 questions

AI Should Evaluate

- Communication
- Confidence
- Resume authenticity
- Understanding of listed skills
- Learning mindset
- Clarity of explanation

Example Flow

1. Tell me about yourself.
2. Walk me through your resume.
3. Tell me about your strongest project.
4. Why did you choose this tech stack?
5. Which technology are you most confident in?
6. Why are you interested in this internship?
7. What are you currently learning?

Pass Criteria

Minimum score: **70%**

Must pass:

- Communication
- Resume authenticity
- Basic technical understanding

Fail immediately if:

- Cannot explain own resume
- Major inconsistencies
- Cannot explain listed projects

Round 2 — Technical & Project Deep Dive

Objective

Verify project ownership and evaluate technical reasoning.

This should be **adaptive**, not scripted.

Every answer determines the next question.

Duration

20–30 minutes

Difficulty

Easy → Medium → Hard

Phase 1 — Project Understanding

Questions

- Explain your project.
- What problem does it solve?
- What was your contribution?
- What technologies did you use?

Phase 2 — Technical Decisions

Questions

- Why React instead of Angular?
 - Why MongoDB instead of PostgreSQL?
 - Why REST instead of GraphQL?
 - Why JWT authentication?
-

Phase 3 — Implementation

Questions

- Explain the authentication flow.
 - Explain the database schema.
 - How does the frontend communicate with the backend?
 - Explain one API in detail.
 - How is state managed?
-

Phase 4 — Edge Cases

Questions

- What happens if the server crashes?
 - What if two users update the same data?
 - How do you prevent duplicate requests?
 - What if the API becomes slow?
-

Phase 5 — Scalability

Questions

- Support one million users.
- Reduce API latency.
- Improve database performance.

- Design for high availability.
 - Improve deployment.
-

AI Evaluation

- Technical depth
- Ownership
- Architecture understanding
- Debugging mindset
- Decision making
- Scalability thinking

Dynamic Difficulty

Strong Answer

Increase Difficulty

Average Answer

Stay Same

Weak Answer

Ask Simpler Follow-up

Repeated Weak Answers

End Round

Pass Criteria

Minimum score: **75%**

Mandatory:

- Project ownership
 - Technical reasoning
 - Architecture understanding
-

Round 3 — Coding Assessment

Objective

Evaluate problem-solving ability rather than memorization.

Duration

30–45 minutes

Difficulty

Easy → Medium

Section A — Coding

One or two coding questions.

Topics

- Arrays
 - Strings
 - Hash Maps
 - Sorting
 - Searching
 - Two Pointers
 - Sliding Window
 - Stack
 - Queue
 - Linked List (basic)
-

Section B — Debugging

Present buggy code.

Candidate should

- Identify the issue
- Explain why it happens

- Fix it
 - Improve the solution
-

Section C — Complexity

Ask

- Time Complexity
 - Space Complexity
 - Better approaches
 - Edge cases
-

AI Evaluation

- Correctness
- Code quality
- Logic
- Optimization
- Communication
- Debugging

Pass Criteria

Minimum score: **75%**

Round 4 — HR & Behavioral

Objective

Evaluate professional behavior and workplace readiness.

Duration

10–15 minutes

Categories

Category	Questions
Motivation	2
Teamwork	2
Challenges	2
Learning Mindset	1
Availability	1

Total:

6–8 questions

Example Questions

- Why do you want this internship?
 - Tell me about a challenge.
 - Describe a conflict in a team.
 - How do you receive feedback?
 - Tell me about a mistake you learned from.
 - What motivates you?
 - When can you join?
-

AI Evaluation

- Communication
- Professionalism
- Growth mindset
- Teamwork
- Responsibility
- Cultural fit

Pass Criteria

Minimum score: **70%**

Final Recommendation Engine

Instead of simply averaging scores, weight each round based on its importance for internship hiring.

Round	Weight
Resume & Introduction	20%
Project Discussion	35%
Coding Assessment	35%
HR & Behavioral	10%

Final Decision

Overall Score	Decision
$\geq 85\%$	Strong Hire
75–84%	Hire
65–74%	Hold / Review
$< 65\%$	Reject

Hard Rejection Rules

Regardless of overall score, reject if the candidate:

- Cannot explain projects listed on their resume.
 - Shows evidence of resume fraud or misrepresentation.
 - Fails fundamental coding or debugging tasks for technical roles.
 - Demonstrates unprofessional or inappropriate behavior.
-

AI Features (Recommended)

To make the platform feel like a real interviewer rather than a quiz:

- **Adaptive questioning:** Generate follow-up questions based on previous answers instead of following a fixed script.
- **Role-specific question banks:** For now we only have to focus on Frontend, Backend, Full Stack.
- **Evaluation:** Evaluate communication, technical accuracy, reasoning, confidence, and completeness after each response.
- **Early termination:** End a round if the candidate consistently performs below the threshold, reducing unnecessary interview time.
- **Personalized feedback:** Provide strengths, improvement areas, and recommended learning resources after the interview.
